

## PREPARATION GUIDE FOR BED BUG EXTERMINATION SERVICE

### Stay Focused on Beds and Couches where people rest.

Ignore, at least initially, the closets, drawer chests and dressing tables and everything else that is more than 3 feet away from a bed.

### Focus on Beds and night tables.

Begin by removing articles stored under and around the beds.

Empty out the night tables. Disconnect and remove electronics.

Take the mattress and box-spring off the bed.

Inspect and clean out the five components of a bed. There will be dust, debris and possibly bed bug remnants. In the end clean the floors in this area.

You would need a good **vacuum and brushing tools** to accomplish a good cleaning. Do not neglect the utility of a **good lighting** before you begin to clean.

Thoroughly vacuum the **sofa and couches** - inside and underneath.

Double Check your Preparations.

Unplug all electrical appliances from electrical sockets and put them out of the way.

**NOTHING SHOULD BE LEFT ON TOP OF THE BED FRAME NOR UNDERNEATH IT.**

If you plan to obtain and install good quality and proper sized Bed Bug covers for the mattress and the box-spring, we prefer that you have it done it before the treatment. Now if you want to expand your cleaning to furniture beyond 3 feet of your bed, it would be worth while.
